BOSTON 15, MASSACHUSETTS

September 22, 1960

Dr. Joshua Lederberg
Stanford University
Department of Genetics
School of Medicine
Palo Alto, California

Dear Joshua:

We are looking into the possibility of offering a tenure position in this department to Milton Salton.

I would be very grateful if you could take the trouble to send me a letter evaluating the significance of his accomplishments and his promise for the future. Such a letter would be very helpful to the committee that is considering this proposal.

With best personal regards,

Sincerely,

Bernie

Bernard D. Davis

Dear Bernie —

I would judge that you're very fortunate, but I don't know Salton at all well and could not readily write about him. — Es Snell?

Roger Starnier?

Josh.
